“Thought”

Throughout my life I have always had a strong desire to learn all about the world around me, and have therefore always been drawn to scientific subjects, In my opinion, chemistry is by far the most broad and fascinating subjects of the sciences...

Since studying Chemistry and Design & Technology at A level, my desire to develop my knowledge of Chemistry, incorporating the use of chemistry with technology, has increased, I wish to Study in greater depth the potential interrelations of these subjects and look forwards to the unique creative possibilities that a greater knowledge and understanding of them will bring..

I have great interest in question such as “ How do you convert raw material into useful products through the application of chemistry on a large scale, or more accurately, how to create for modern everyday life, in a safe efficient and environmentally friendly manner?” Question such as these were triggered at a younger age by issues such as the manufacturing of different type of coating , and how they are extracted, and produced.

Now we have a unique world class coating in the paint industry with the help of European technology.

COMPANY PROFILE

Huesky Premium Coatings is manufacturers of high performance Paint/coating to serve European technology to indian market. With the liberalization, multinationals have come to the country with their latest technology and expertise. As a result have become more knowledgeable and their demands are ever increasing.

OUR MISSION

We are dedicated to satisfy the customer need for cost effective, durable, eco-friendly and quality products through excellence in manufacturing, distribution, latest technology, people empowerment and brand equity.

OUR VISION

Customer delight providing consistently innovative quality products at competitive price, on scheduled time, using talented and experienced professionals in the field of industrial coating.

The different products are formulated in our research and development and only after the successful test are sent to our Manufacturing unit. We have developed effective research & development unit that aims at to develop efficient and cost-effective coatings. The unit works in close co-operation with Production and marketing departments, so that the products developed are in accordance to the market demands. We have our own in-house laboratory backed by a team of researchers who ensure effective research and analysis activities.

Specialization Through R & D:

SKYCO Coatings for OEM market (Original Equipment Manufacturers).-

SKYCO Coatings for ACE Market (Agriculture, Constructions Equipment Manufacturer)-

SKYCO Coatings for WOOD.

SKYCO P.U. High performance Acrylic/Polyester coating considering product economy.-

SKYCO Also P.U. one pack blocked isocyanides coating.-

SKYCO AUTO REFINISHING.-

SKYCO MIRROR BACK Coating-

SKYCO OEM Coating for plastics.-

SKYCO Heat resistance coating, resistant up to 700° C as per international standards.-

SKYCO High performance Epoxy Base Coat Primer and Finish Coat.-

SKYCO High performance stoving system like TSA Coatings, Modified Polyester and Alkyd Amino systems etc.-

SKYCO Quick Drying Acrylic system with highest corrosion, UV resistance.-

SKYCO Chlorinated Rubber Coating System Vinyl Coating System. RESEARCH & DEVELOPMENT

SKYCO coating offers one of the most diversified range of industrial coating in 100% P.U., Epoxies, Acrylic, Polyester and Alkyd for all kinds of surface. Our world class coating are backed with superior technical expertise thus enabling us to offer customized coatings solution with respected to specific requirements and respective budgets.

Primarily Motley coating products are popularly used in Locomotive Coatings, Heavy Engineering Coating, Defense Coatings, Transformer Coatings, Infrastructure Coatings, Handicrafts, Home Furnishing, Pipeline Coatings Etc.

Types of industrial metal coating

- Hybrid Catalysed 3K
- Catalysed 2K
- Polyurethane
- Epoxy
- U.V. Curved
- TPAITSA
- Fire I Heat Resistance
- Alkyd Clear
- NISO
- NC
- Dye Stuff Solutions

SKYCO is one of the leading Glass Coating Manufacturers that offers very specialized systems for glass coatings for different industrial and domestic applications, viz. opaque shades as white, black, etc. are also offered in this range apart from transparent and frost finishes. This unique product has also found its way in automotive and infrastructural applications. Following systems are offered.

PU GLASS COAT:

This is a PU Coating (2K) based finish for glass substrate in transparent frost and opaque finish for application on glass surface like glass bottle for liquor, perfumery, fancy lights etc.

LICOCOAT:

Licocoat is a single component solvent based thermoset lacquer designed to give a tough chemical resistant finish to liquor bottles. We add durability to your precious tastes. It is printable and hot stampable. It's resistant to heavy metals like lead, mercury, arsenic etc. Certified by renowned international agencies and can be used for exterior food packaging applications. It is being used in well-known liquor brand like Vat-69, Diageo etc. It is available in various finishes viz gloss, matt, opaque, metallic and pearl.

SKYCO offers an extensive range of products for different types of Plastics such as FRP, ABS, CRP, HIPS etc. The following products are widely used by various industries, such as, Helmet, Toy; TV, Computer and Auto Components manufacturing units.

SKYCO Polyester Spray Filler - This product has very high solid and good filling capacity to fill the pores and dents in FRP. Also, it has excellent smoothness and build. For FRP Helmet painting, it is widely used.

SKYCO PU Basecoats - The economical range of PU specially designed for Plastics Industry to clear the line productivity. This product has faster drying characteristics with good aesthetics.

SKYCO PU Clear - This clear has very good film build and clarity. Also, it has a faster drying time.

SKYCO Putty / Light Weight Body Filler - Polyester putties to take care of different requirements - one of the best sellers in the category due to its ease of application, sanding and smooth finish.

SKYCO UV Clear - The latest and new developed product Already established and widely being used in TV industry, Helmet application. The product has excellent gloss, aesthetics and hardness.

SKYCO Coatings offers 100% PU Wood Coating Systems of Natural Finish with Natural Fillers, PU Sealers, Stainers, PU Topcoats (Glossy & Matt) of International Quality standards, which are LEAD FREE and FOOD Grade suitably designed for exterior and interior applications. Motley's Water Based Wood Coatings provide desired aesthetics and durable protective finish to your Furniture, Doors, Windows, Parquet Floors, Music Instruments, Sports Goods, Antiques etc. that lasts over the years with:

- Excellent Adhesion
- Non Yellowing
- Scratch Resistance
- UV Resistance(Classic Wood and EquaWood Exterior)
- Excellent Color Retention
- Heat Resistance
- Domestic Spills Resistance
- Humidity and Moisture Resistance
- PU 1K
- PU 2K-1:1, 2:1, 4:1
- Melamine Coatings
- Polyester Coatings
- Epoxy Coatings
- NC Coatings

SKYCO UV Wood Coatings are popular with Architects and Applicators across India and are offered in both Solvent Based and Water Borne finishes comprising of the following range

SKYCO Coating offers a comprehensive product range, technical support & service to cater to the specific needs of Auto OEMs & Component suppliers keeping in mind the latest global trends. wide range of undercoats and top coat are also available to suit the requirements of various segments like luxury coaches, four wheelers, two wheelers etc.

Be it corrosion protection, environmental application concerns on vehicle finish performance improvement we give customized solutions to all. Complete product range from traditional 2K acrylic system, fillers, clear coats, under coat system, modern high solid and water based system to technically superior and demanding IMC for PU moulds.

Types of Automotive Coatings

SKYCO Auto PU System:

SKYCO Q.S. Clear Is a general purpose clear for automotive with excellent gloss.

SKYCO PS DP Grey Is a dark color primer surface for automotive application which is fast drying and easily sandable it can be applied on machine buffed GI and aluminum without etch primer.

SKYCO Classic PU System:

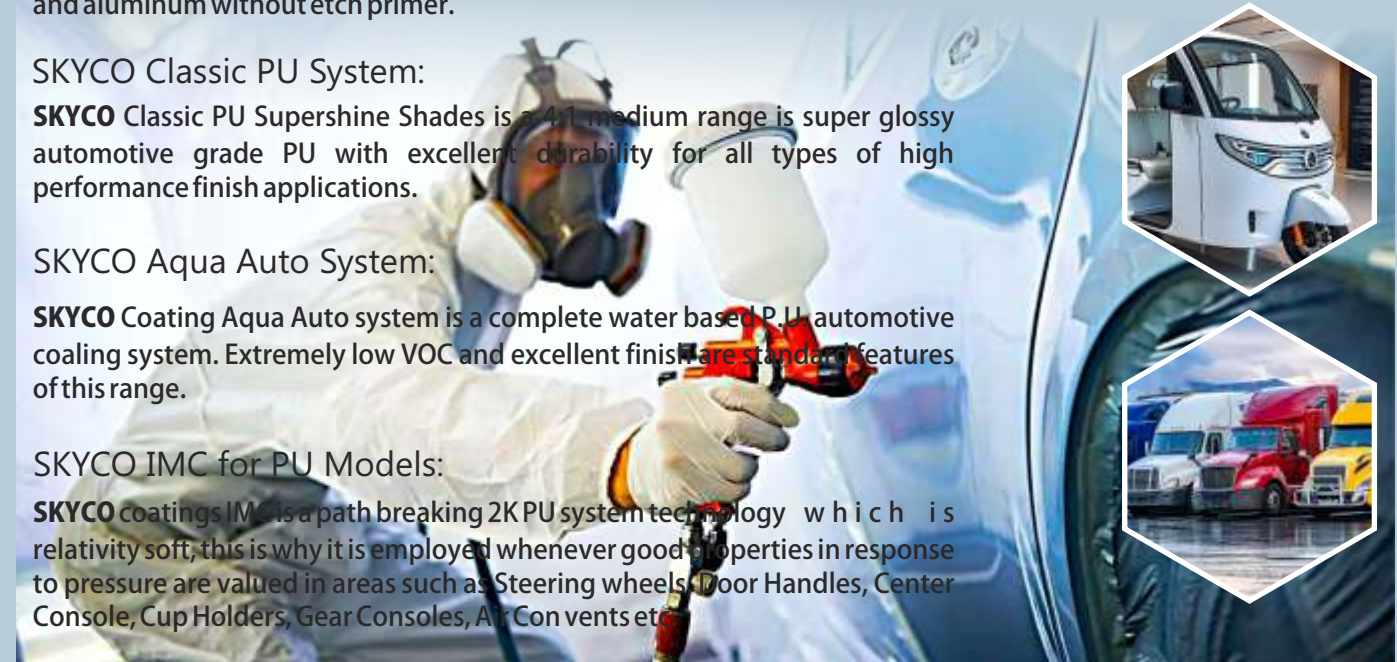

SKYCO Classic PU Supershine Shades is a 4:1 medium range is super glossy automotive grade PU with excellent durability for all types of high performance finish applications.

SKYCO Aqua Auto System:

SKYCO Coating Aqua Auto system is a complete water based P.U. automotive coating system. Extremely low VOC and excellent finish are standard features of this range.

SKYCO IMC for PU Models:

SKYCO coatings IMC is a path breaking 2K PU system technology which is relatively soft, this is why it is employed whenever good properties in response to pressure are valued in areas such as Steering wheels, Door Handles, Center Console, Cup Holders, Gear Consoles, Air Con vents etc.

HEAT RESISTANCE COATING

Industrial Heat Retardant

Industrial Heat Retardant Paint Many heat resistant coatings also have an anti-corrosive finish, which adds more protection for the surface. Rust-Oleum 4200 Heat Resistant Primer can be used on incinerators, stacks, kilns and other very high temperature surfaces that are prone to rust. This heat proof primer should be used on new, bare steel or blasted steel underneath Rust-Oleum 4200 Heat Resistant Topcoat.

If you're looking for protection from corrosion on stainless steel industrial surfaces, **SKYCO** HR Paint is ideal. Motley HR Paint Works specifically on surfaces that need to withstand extreme high and low temperatures, between -200° C and 800° C and can be applied directly on to a surface that is at 400° C.

For large aluminium surfaces, such as offshore structures, petrochemical and chemical plants and power stations, International Intertherm 891 is an excellent choice. Intertherm 891 is a general-purpose heat resistant paint that gives a silver finish as it's coloured with aluminium flake. It can be used as an industrial maintenance coating on steelwork with a temperature ranging from ambient to 315° C.

For more information and specifications on heat resistant high-temperature paint, don't hesitate to get in touch with our Technical Team who will be happy to talk you through your options.

NOVELTY COATING

SKYCO Coating offers novel mixing technology for striking different finishes which come in an array of brilliant colors and combinations for that exclusive appeal. The designer's best choice is made possible from creative finish on any surface with crackle, marble, ferrodin, twinkle, lamination, pearl, hammer finishes like:

Types of Novelty Coatings

- **SKYCO** Twinkle Finish
- **SKYCO** Crackle Finish
- **SKYCO** Lamination Finish
- **SKYCO** Classic PU
- **SKYCO** Metal Tone Dye Solutions
- **SKYCO** Pearl Hammer Tone
- **SKYCO** Marble Finish

HARD COAT

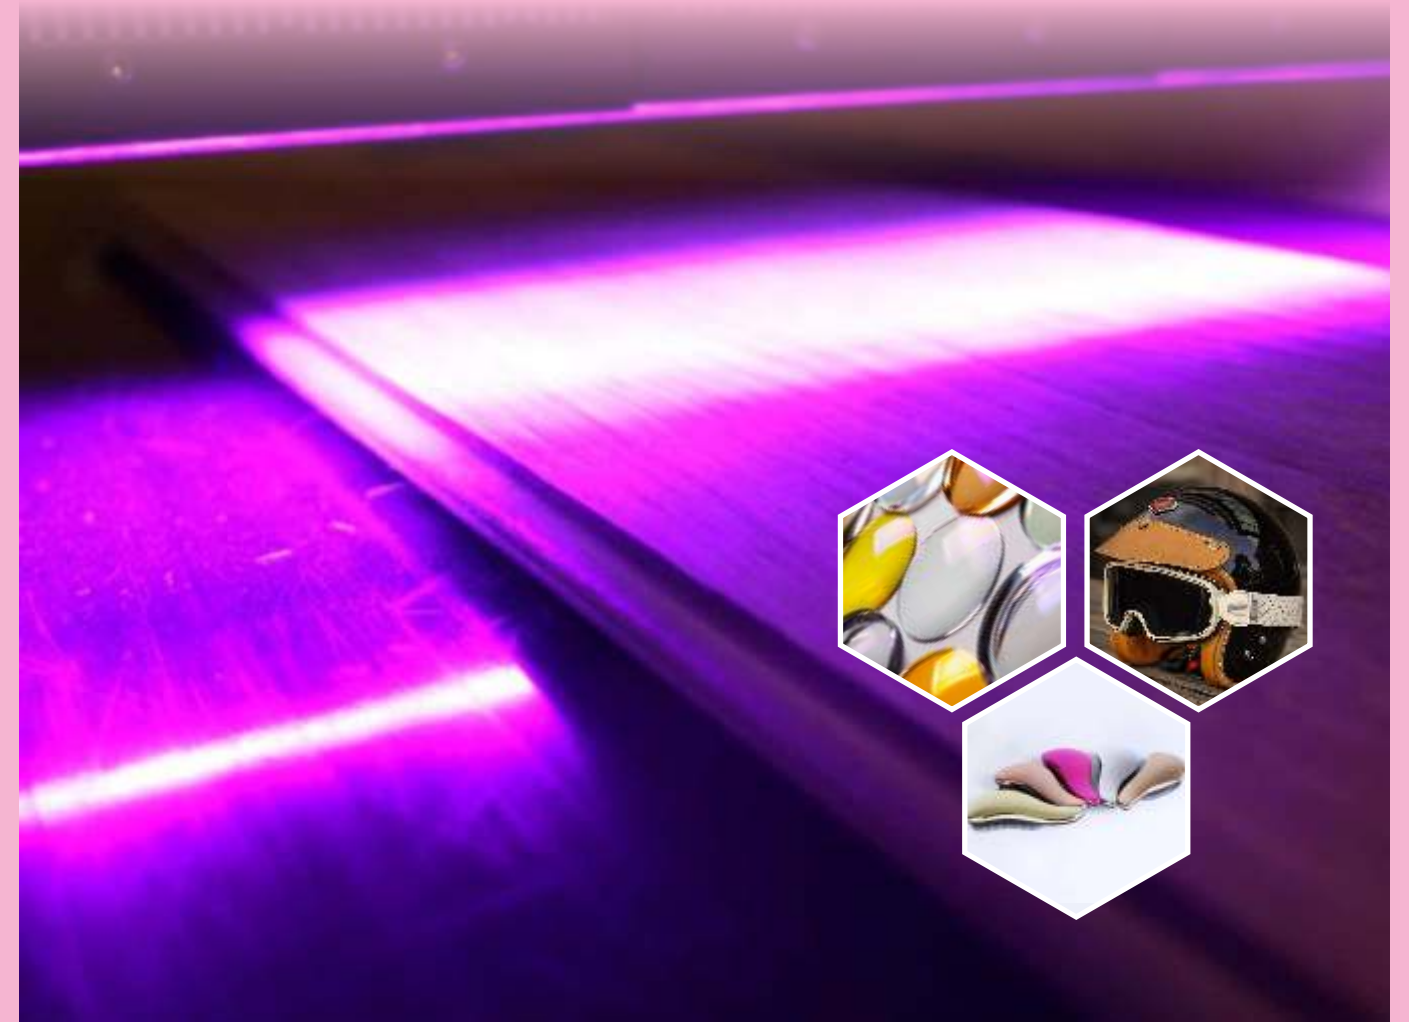

SKYCO High Thermally Cured Hard Coat Provides The Best Scratch Resistance And Provides For The Most Durable Ingredient For An Ar Coating Application. Coatings Offers An Alternative That Minimizes The Amount of Air Pollution, Coatings Offer A Greater Protection From Scratches, Chipping, Abrasions, Corrosion, Fading, And General Wear. Can Also Act As Electrical Insulators, Scratch Resistant Coating Or Hard Coating Provide Lenses With Durability And Increased Longevity.

U.V. COATING

SKYCO Coating provides extensive range of products for different types of plastics such as FRP, ABS, CRP, HIPS etc. The following products are widely used by various industries such as, Helmet, Toys, Tv, Computers and Auto Components manufacturing units.

ANTI DUST

SKYCO Anti-Dust: Dissipates static charge which attracts dust. Reducing static electricity to a surface will result in dust not being able to cling to the surface, greatly reducing dust build-up. Great for dust control. Anti-dust technology is an interesting innovation among ceiling fans, Electric Switches and other surfaces. These are designed to attract less dirt than regular surfaces.

ANTI BACTERIAL

SKYCO Antimicrobial Parylene Technology: Effectively eliminates microorganisms on coated surface. A new antimicrobial coating technology is now available from Specialty Coating Systems: **SKYCO** Antimicrobial Parylene Technology. This significant breakthrough combines the benefits of biocompatible Parylene with antimicrobial properties to effectively eliminate harmful microorganisms on coated surface.

Dear All

I want to take a moment to thank you for your support. understanding, help, guidance, and encouragement through this wonderful time regarding. It is comforting to know that I am surrounded with such caring people. Thank you so much.

Your continuing support and encouragement are appreciated more than you recognize it. Thank You for being so undemanding regarding the (issue). I am grateful to you to show your trust and confidence in me and I am sure that you will be pleased by the end results.

Thank you once again.
